

PIEZORESISTIVE PRESSURE TRANSMITTERS

ABSOLUTE-, GAUGE- AND DIFFERENTIAL PRESSURE

These piezoresistive transmitters have been designed for precision applications in industrial environments for pressures ranging from 0,2 to 1000 bar, liquids or gas.

Series 23: Male pressure port

Series 25: Flush diaphragm

A Complete Range

Absolute, barometric, gauge (over- and underpressure) and differential for wet/wet applications. 13 nominal pressure ranges. Current or voltage output.

Flexibility

A modular concept uses the selection of off-the-shelf capsules, allowing a customised production. Numerous options and variants are available, fully adapted to the customer's requirements: Mechanical and electrical interface, ports, signal outputs, materials in media contact, oil filling, oxygen-compatibility, special features.

Reliability / Quality

These transmitters use the highly stable KELLER Series 10 capsules, proven in millions of applications throughout the world. Each capsule is subjected to severe tests and calibration procedures.

The type of the transmitter is defined according to the reference pressure:

- PAA-23/25** Absolute Pressure Transmitter (Zero at 0 bar abs.)
- PA-23/25** Sealed Gauge Pressure Transmitter (Zero at 1 bar abs.)
- PR-23/25** Vented Gauge Pressure Transmitter (Zero at atmospheric)
- PD-23** Differential Pressure Transmitter (wet / wet)

Options

Pressure Connection, Electrical Out	On request, many possibilities
Pressure Ranges	Other pressure ranges between 0,2 and 1000 bar, different units
Accuracy (Linearity)	$\pm 0,2$ %FS max. or any customer requirement
Materials in Contact with Media	Many possibilities
Oil Filling	Fluorized oil (O ₂ -compatible), olive-oil, low temperature oil
Protection	IP67, IP68 (cable version)
Higher Static Line Pressure	up to 600 bar (PD only)
